FOREIGN RIGHTS CATALOGUE

Welcome to the Catalogue of Erdem Publishing Group

Erdem Publishing Group was founded in 1984 in Istanbul. Here is a showcase of our range of charming, colourfully illustrated stories and educational books. Erdem Publishing Group has around 1500 interesting books.

Erdem offers to readers a variety of fiction, classic and modern books as well as non-fiction ones. Our aim is to enable the children to enjoy learning and reading process. An exhaustive range of educational and activity books are also available to help preschool children develop general skills such as handwriting, maths, spelling, sentence formation and so on. If children are provided a well-constructed preschool period with foundational learning skills, this could be a useful pave for them to be good learners and conscious individual in their future life. Our teacher-guided solutions and creative exercises are designed to support both children and families by promoting necessary skills and creative minds.

We also aim at having adult readers to reach a rich content about history and have a broader cultural life of our society. As one of the most leading company, with a 30-year-old publishing experience and more than 1000 titles, we are proud to give service to our readers in strong bonds.

WISE EXPLORERS

This series appeals to perceptions and taste of curiosity as well as certain values that are assigned by school curriculum.

Every title is based on a scientific field to evoke children's curiosity and urge to make research. And activities are prepared within the frame of integrated spiral curriculum.

As well as line, concept, attention, nature and science, mathematics, scamper, sports activities, manners and cognitive activities, various artists, scientists and sports people are presented.

Rhythm activities are also designed for musical improvement with specific songs, related to every subject.

We want children to explore Earth, space and environment; feel their "conscious human being" role in the universe, grow awareness for all living things and bring out the necessary elements and acts, that's why scientific knowledge is taken as a priority.

VALUES WITH VERSES

This series of ten books is based on the verses of our holy book that guides us to good morality and virtue. At the end of the stories, you will find enjoyable activities that will help bring these virtues to life. Each story has a verse from the Quran in the beginning. The stories are based on the virtues of that verse without being dogmatic. This series is developed for children to enjoy exciting and funny stories while getting familiar with the verses as well as understanding and internalizing the values behind the holy book.

TIMELESS DIARY OF GOODNESS

Written by: Cihat Albayrak & Ayşe Ünsal

Timeless Diary of Goodness is very different from the agendas you know. The Timeless Diary of Goodness shows that one can do something good every single day, without losing any time or needing anything extra. No matter where you live, what you do or how busy you are, there's always time for some goodness. Because being good to others means being good to yourself. 365 days and 365 ways to make some nice things happen in the world.

We are changing the definition of an agenda! In this agenda you do not write down the things you will do. Each page for 365 days you are trying to do good deeds. In the agenda you will surely find favors that you can do easily. A favor you will do is a pioneer of other good deeds.

For 365 days, we gave each day a favor you can do for others and placed it on the pages of this timeless agenda. You now have an agenda that covers all times, fits every day of each year, and is not put next to the half-empty notebooks when the year ends. The Timeless Goodness Agenda, embracing goodness every day, every page, will change your ideas about time, place and well-being. Remember! A good deed makes us beautiful, and a good deed beautifies us and our world. Let's be beautiful together!

246 GAMES AND ACTIVITIES FOR CHILDREN You Can Play Everywhere

Written by: Elif Konar Özkan

"The child becomes wise with play, and he comes to his mind when he plays."

Mesnevi, Volume 6, verse 2255

Play is the most effective way for a child to learn many subjects from their own experiences. Most of the activities that we consider as "games" are mental activities. From infancy, children learn to distinguish, to find effective behaviors, to discover objects in the environment, and to research, through experiments that adults describe as "games". Sometimes the child copes with situations that he / she does not want in the real world by playing games.

The Everywhere Playbook includes suggestions for games that you can play with children in the classroom, at home and in the garden. The play narratives given in the book, which will be a guide for children, families and teachers, are also supported with pictures.

Are you ready to discover the cheerful game world between the two covers?

Paperback

NEW!

This series is suitable for kids around 3 years old and up. It focuses on the problems between parents and their kids as well as gives some tips for solving them. Babies step into new world when they were born.

They experience and try to learn about the world which surrounds them, but they come up with a lot of problems as they grow up. These problems (to meet new friends, communicate, play games, chose their clothes, wash their hands, hygiene, good manners etc.) can be very huge and important for the kids even if not that important for the grown-ups. Efe and Ece will accompany to their peers in this journey with simple stories and vivid illustrations. Also, this series will support their development with entertaining activities.

The Lonely Pebble Story

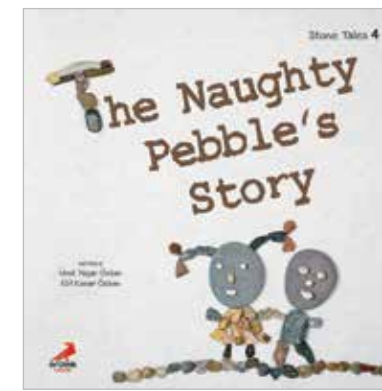

The Snailstone's Story

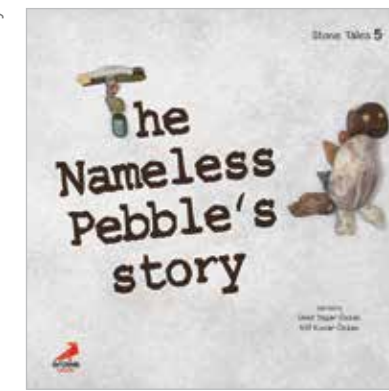

Pebble Games

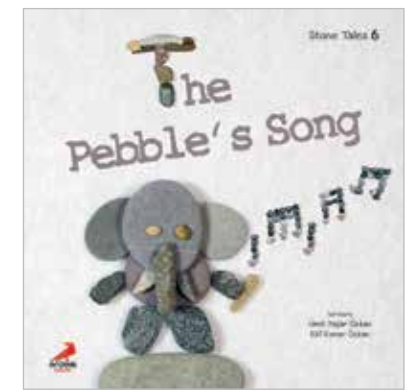

The Naughty Pebble's Story

The Nameless Pebble's Story

The Pebble's Song

The most important feature of this series, which is illustrated individually with fingerprints, is the fact that it was developed to support growing children's consciousness of being an individual as well as bringing awareness of their inherent features and help them find peace with themselves.

The Land of Gakguks is a place where tiny and cute ravens live. These black ravens are adorable characters made up of fingerprints. Gukki the singer, a baby raven with the voice of a nightingale, is looking for a place where others will enjoy his songs and accept him. Is there such a place? Gaki is very friendly with their neighbors, the Blue Feathers. But he does not want to be just a friend of them. He wants to be just like them. He even wants to live with them. Could a raven be like a Blue Feather? Dressy Chocolate wants her beak to be just like the beak of a magpie, so she decides to have surgery. Could the beak of a raven be turned into a magpie beak? What happens if it can be? How would you like to travel to the Land of Gakguks where you can hear the music words played in a simple and fun style?

One of the effective ways to explain some concepts and values to preschool children is storytelling. Bobo is the child of a crowded family that has just started kindergarten at the age of 6. Like every child, he sometimes has some problems with his siblings, friends and parents. There are many things he is curious about. In our books, which will also attract attention with their colorful pictures, questions were prepared to reinforce, reflect on and talk about each subject. While having fun with your children, you will also contribute to their development. These stories are intended to make children have a good time while learning things in an effective educational process involving questions and activities. Bobo has been designed to enable preschool teachers to use it in a school environment or parents at home. It is a practical and enjoyable set. Children will be able to look at the illustrations while listening to the tale and answering your questions.

A WALK IN THOUGHTS

Humankind has always asked questions to understand their surroundings. Children have a special eye for nature's secrets. Aunt Merve takes the kids out for a walk. They walk through and explore nature which is full of gifts and surprises waiting for them. The kids have a lot of questions but Aunt Merve does not answer them directly. She pushes the children to think and analyze their knowledge to find the connections. What will they discover in this journey of awareness? What will they learn at the end of the journey? With colorful illustrations, the book tells the story about how lucky it is to be a human that has been gifted by God.

THE STORY OF NASRETTIN HODJA AND THE STINGY NEIGHBOR

Well-known Turkish philosopher and wise man Nasreddin Hodja is a very popular folk character who is believed to have lived during the 13th century. Nasreddin Hodja has a couple of different tales that have been told from generation to generation. This book combines all of the tales into one cohesive story.

Nasreddin Hodja is both knowledgeable and ready to answer. Everyone knows that Hodja is both helpful and generous. But Nasreddin Hodja has a neighbor who is very stingy, he is aware of everything that goes into Hodja's house. Hoca, who was looking for a cure to this situation, found very creative solutions. Would he ever give up his benign nature?

THE PRINCE OF SPRING

Little Feather is as curious as everyone else in the Land of Crows, about what the Dream Sellers are selling. He thinks that they can fulfil his dreams. He wants to buy one of the many things the Dream Sellers are selling, and he buys the Shah of Iran's perfume bottle. However, the bottle isn't full, nor does it have a smell. Little Feather fulfils his dreams not by outer sources but from within. The author focuses on the increasing consumerism culture which the children in today's world are exposed to. Moreover, whilst criticizing turning 'personal images' into buyable goals, the writer emphasizes the importance of one's own effort and imagination. The text is accompanied by collages made with materials suitable for the content, alongside exceptional pictures.

THE MAN WHO FIXED EVERYTHING

The story that begins with repairing a broken vase to a whole entire country ... Beautifying life can be made possible through one's struggle with the obstacles in front of him or by repairing the things that are broken. This is true for a human's life as well as for the historical process of countries and even the world. With this understanding, The Man Who Fixed Everything is inspired by a historical figure, with a metaphorical narrative, from the repair of a vase to the restoration of a country. Reza Hemmatirad illustrated the book, The Man Who Fixed Everything, written by Hasan Karaca in an interesting style, in a style appropriate to the texture and expression of the text.

THE MOST ORDINARY TREE OF THE FOREST

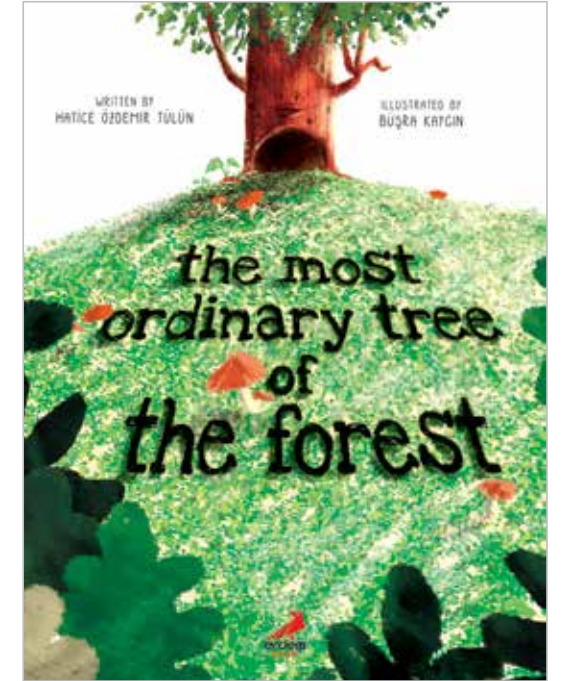

Everyone is unique. Every child, every adult, every person is unique and one of a kind. However sometimes it takes some children longer to understand their uniqueness. This book takes on this delicate topic in the beautiful environment of a forest, in the form of a beautiful story and makes children and nature the heroes! Pitipat is an ordinary tree in the most beautiful forest in the world. While all the other plants and animals and bugs talk about their talents and features, Pitipat has nothing to say. Until one day a group of students comes to the forest and are all in awe of Pitipat. Wonder what caught their attention so much.

Little bird owlet makes mistakes because it is young and it is not always kind to others. However, it is growing up and it is learning how to greet people, to apologize, to thank, to be respectful, to show love, to share, to be tolerant, to be kind and a lot of kind acts like these. The little owlet does not only learn how to be kind in this series. It is also making nests on different trees in each story and it is learning about the trees and his environment, too.

With activities at the end of every book it is aimed to develop the understanding of etiquette in children and to support them develop good behaviors.

SCIENCE WITH LOONY AYŞE

Ayşe is an enthusiastic and a little loony kid. She always has a lot of questions. Ayşe, who wants to be a scientist, of course, doesn't leave these questions alone. She asks the question, "Why did the apple fall down?" when her apple falls down from the table. Ayşe, who learns about the gravity by asking the question, is interested in science and everything about science. She finds herself in situations where scientific principles like buoyancy of the water, photosynthesis, gravity in space, the structure of atoms, the sound of the boiling water are explained. Of course, this is not all. Funny things, jokes and the fun are also included in her journey. Learning science has never been this funny.

WOMEN OUT OF THE BOX 2

How many people can the story of a single woman inspire?

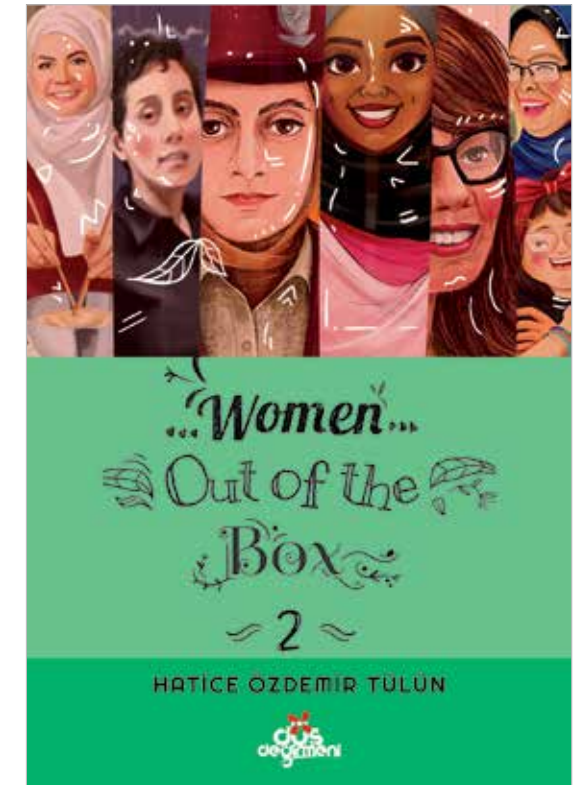

They got out of "unlikely" situations, times where they were told "not now" and they hugged their "impossible" dreams, wherever their hands touched, they made flowers of hope bloom. They became cooks, pilots, teachers, doctors, mathematicians, scientists, soldiers, activists, musicians, managers, boxers. Their story began in a random country, in a random city, in a random neighborhood, in a random building... just like the countless women who kept going with the strength from them. Reaching a large audience, Women Out of The Box is in your hands with the second book. The game breaking stories of 24 women from across the world is here to accompany the ones who are following their ideals and dreams.

ISTANBUL FAIRYTALE -I-

Kerem, is a smart, introverted boy who likes books and doesn't have many friends. His closest friend is his grandfather and his favorite thing is to listen to the tales and legends his grandfather told about Istanbul. In a dream Kerem saw after losing his grandfather, a mysterious man told him, "Find the signs! Find the guide! Follow your grandfather's stories," although he could not make sense at first, after a while he would find himself in the middle of a long and difficult adventure. There are legends in the notebook left to Kerem from his grandfather, but some pages are missing. He has to protect the legends from Merza, who awakens from his sluggish sleep that lasted for centuries when all the legends are collected and the notebook is completed. The only way to recognize Merza who can shapeshift is his eyes. His colorless, hazy eyes with no pupils... He lives in the smell of the evil. In the sky as the air gets polluted, in the water as the sea gets polluted... Everything beautiful makes him sick in his stomach and makes his life miserable. After the Land of Legends is established in Istanbul, the world begins to become unbearably beautiful for him. He has to get rid of all the legends that are collected in the Land of Legends and spread his evil!

Kerem shares his great secret with his friend Gülin, Assad and his grandmother Ms. Zeliha; They try to complete the tales and legends by traveling to different times and places by following passwords altogether. Kerem has other assistants as well. Haydar, the leader of the seagulls, and Rânâ, the princess of the Land of Legends, transformed into a seagull by Merza, help them and Istanbul by sending passwords and protecting them from the traps of Merza. Because protecting fairy tales and legends means protecting the beauty of Istanbul. Will Kerem succeed in completing the fairy tales and legends despite all the evil of Merza, will he be able to preserve the beauties of Istanbul?

On each page of this book, you will read very special stories about Istanbul, the Land of Legends, and you will be involved in a fun adventure through the streets of Istanbul with characters that will warm you up!

"Your grandfather is always with you," said the man. "As long as you love someone, you will be with them. Love is the only thing that beats death on earth."

ISTANBUL FAIRYTALE -II-

Kerem and Gülin try to find new fairytales for Rana to be able to get out of the tale land and to be with them. When they write stories with the charmed feather that Rana gave them, they gather a lot of attention in social media. So Merza, who lives in the shades of evil, tracks them down and he is even stronger now with his new assistant Giryân Nakız, whom he raised himself. They start controlling the people of Istanbul with the bad foods they feed them. When the charmed feather falls into the hands of Merza, the hidden path to the World of Legends opens up and Rana disappears. This time, they have to find a whole new way to save Istanbul and to be able to get back together. Will the stories coming from unexpected sister lands be able to stop the evil this time?

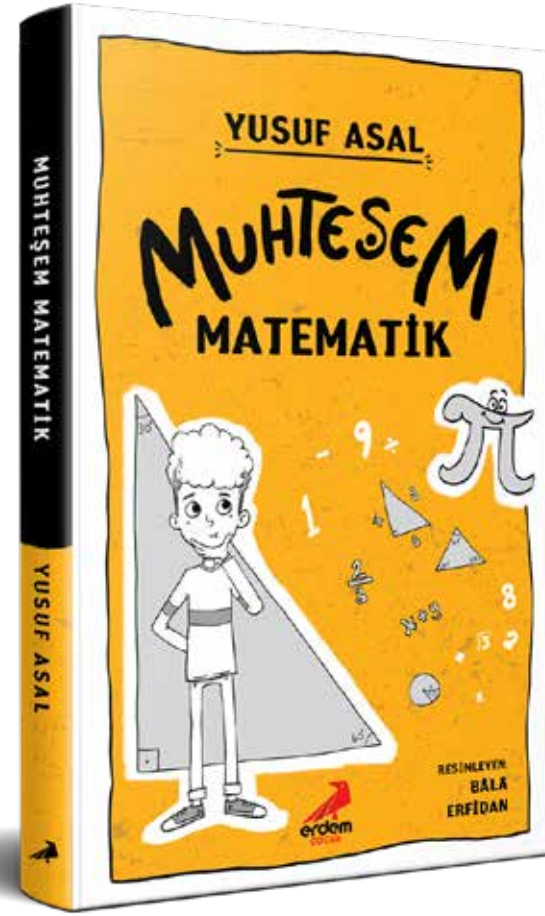

NEW!

Galileo Galilei 1564 yılında İtalya'da dünyaya gelmiş; astronom, Fizikçi ve matematikçidir. Hollanda'da teleskop icat edildiğini öğrendikten sonra oraya gitti ve kendisi daha gelişmiş bir teleskop yaptı. Yaptığı bu teleskobu astronomi gözlemlerinde kullandı. Çalışmaları sonucunda "Dünya yuvarıktır." dedi ve bu görüşünü eserlerinde yazdı. Kilise tarafından bu sebeple eserleri yasaklandı. Zindana atıldı, çeşitli cezalara maruz kaldı. Hapsten kurtulmak için sözlerini geri aldı. Ama yine bildiğini okumaya devam etti.

Bunu Biliyor musun?

Galileo, teleskobu astronomi gözlemlerinde kullanan ilk kişidir.

Bunu Biliyor musun?

- Dünya'nın bir adı da Mavi Gezegen'dir. Bu mavilik, atmosferde bulunan Güneş ışığı tayfı sonucunda ortaya çıkar.
- Beyaz ışığın bir prizmadan geçip renkleri ayrılmasına tayf denir.
